Chris **Van Egmond**

Data scientist with a strong quantitative background who is result and people oriented. I combine this with an entrepreneurial mindset and a desire to be broadly developed. 3+ years of consultancy have allowed me to experience different sides of data projects. From creating data-driven strategic reports, to bringing a data science solution to production, designed for a team of commercial stakeholders. This allows me to deliver business relevant solutions, with a focus on creating value and communicating effectively. On the intersection of people, strategy and data - I enjoy myself the most.

SHORT RESUMÉ

Metyis

Present – Dec 2022 · **Associate Data Scientist** · AMSTERDAM ·
- Performed **data analysis, interviews and storylining in a strategic project** for a 9bn international fashion company to reduce the number of SKUs in their collection.
- Lead the development of a **network optimization** for depots and trucks of a gas company in the USA, using linear optimization. Savings were presented to the board and an execution program has started in 2024.
- Presenter, creator and curator of a Data Science Best Practices course for starting data scientists in the company. Course is part of the Metyis Academy, given in Porto.

Dec 2022 – Feb 2021 · **Analyst Data Scientist** · AMSTERDAM ·
- Created a **demand forecasting module** using **Facebook Prophet** for a company in the food and vegetable industry. The product currently runs in production on Microsoft Azure.
- Created **product mapping algorithm** for the commercial team of a Madrid-based international fashion company. The algorithm was **integrated in a Streamlit-based web app** to accommodate easy access for the end-users.

Feb 2021 – Okt 2020 · **Intern Data Scientist** · AMSTERDAM ·
- Designed **pricing experiments** for an international bedding specialist by fitting a **multivariate linear regression** to the sales data.

Solar Monkey

Jan 2019 – Sep 2018 · **Software Developer** · 0.2 FTE ·
Assisting in integrating the algorithm into their Python Django back-end infrastructure.

Sep 2018 – Jun 2018 · **Intern Data Scientist** · 0.8 FTE ·
Clustering algorithm which extracted rooftops, their angle and orientation from satelite data.

EDUCATION

2020 – 2018 · **Master Applied Physics**
DELFT UNIVERSITY OF TECHNOLOGY · Quantum Nanoscience Track
GPA: 8.0/10

2017 – 2013 · **Bachelor Applied Physics**
DELFT UNIVERSITY OF TECHNOLOGY · Minor Mathematical Finance
GPA: 7.3/10

2013 – 2007 · **Gymnasium**
ST. STANISLAS COLLEGE · Delft
Nature & Technique profile, Ancient Greek, Cambridge Track English, Economics, French and Chinese.
